

## ***MultiView PCI™ Card-slot CAT5 Transmitters***

**MultiView PCI-S with  
RS-232 control capability**

The *MultiView PCI™* and *MultiView PCI-S™* card-slot transmitters from Magenta Research, the demonstrated leader in high-resolution video delivery and distribution, introduce a new level of convenience in high-resolution video over CAT5-type cable. By reformatting the components of the MultiView Series transmitters onto a PCI-compatible board, installations are cleaner than ever.

### **Features and Benefits:**

- ◆ Fits industry-standard PCI card slots
- ◆ Transports QXGA video & L / R audio or full-modem serial control (S version)
- ◆ Convenient, space-saving solution for many Pro A/V applications
- ◆ 1600 x 1200 at 1500 feet (457 meters)
- ◆ 1920 x 1440 at 1000 feet (305 meters)
- ◆ No external power supply
- ◆ Fully compatible with all MultiView Series receivers and CAT5 switches

Magenta Research's MultiView™ Series is the industry's only complete "system solution" for the delivery and distribution of video (from NTSC to UXGA), serial data and audio over CAT5/5e/6 twisted pair cables. The unique "building block" approach of the MultiView Series supports applications ranging from point-to-point through distribution to hundreds, including sophisticated switched environments. Multiple models of transmitters, receivers and distribution options transport UXGA video up to 1500 feet (457m), all on inexpensive, easily pulled and terminated twisted-pair cable.
