Technology: InFocus **LP820**

Location: Swanston St Campus, Melbourne

Benefits: Transform meeting room to a conference facility

The LP820 helped transform a small meeting room into a state of the art conference room providing outstanding visual performance for a number of sources including PC, VCR, DVD and reinforced with ceiling mounted speakers. All controlled by a wall mount touch panel allowing any user to select their desired source.

The motorised screen drops down, the projector switches on automatically locking on to the appropriate source. One button switches off the whole system. LP820 - Powerhouse performance in high ambient light. Compact enough for any environment.
