

Complete Classroom Solutions

ezRoom is the most affordable, flexible and complete classroom AV solution

ezRoom-500

- Affordable and flexible
- Convenient networked control
- High quality audio reinforcement
- Remote management
- Pre-programmed master file
- Compatible with most AV gear

"Calypso has provided affordable, easy to use, audio products and classroom control of all video and audio sources within the classroom. Our students and teachers now use classroom technology on a daily basis. We've noticed enhanced teacher-student relationships and a more efficient and dynamic learning environment."

*Wayne Hoisted
Director of Technology
St. Michael -Albertville Schools
St. Michael, MN*

Designed specifically for the K-12 classroom, ezRoom is the most affordable and easy-to-use complete classroom AV solution available. The focus is on making it easy to build, manage and use media-rich, integrated classrooms to improve teaching and learning.

The ezRoom 500 offers a fully integrated classroom AV solution that includes networked device control from our CB-5000 touch screen controller, hardware and software user interfaces, remote monitoring, audio amplification, multi-media wall-plate, and wires, cables and connectors needed to build out integrated classrooms.

ezRoom 500 capabilities include: easy control of classroom instructional devices from hardware and software interfaces, control of typically non-networked devices like projectors and DVD players, fully integrated classroom audio, and remote device monitoring for simplified troubleshooting and maintenance.

The ezRoom 500 comes with a pre-programmed master file, so school technology teams no longer need to manually configure each classroom system. Every aspect of AV classroom design and build-out is simplified. Just add the projector, screen, and AV devices to complete the solution quickly and reliably.

ezRoom is just another way Calypso Systems is making it easier to learn. Call us at 1-888-381-9646 or visit www.calypsosystems.com for more information.

"Using Calypso's ezRoom as the foundation for our new classrooms was a great decision. It's an affordable solution that provides usability and flexibility right out of the box. We were able to customize the system to meet our needs and the support Calypso provided was essential to a successful installation."
